

Because performance matters.

YD, or Yield Dysfunction, is a common yet often not talked about problem that is caused by planting poorly-performing canola varieties. Thankfully for growers with YD, a better seed can lead to a more satisfying growing experience.

And when it comes to getting the bend out of your Brassica, CANTERRA SEEDS' new 1900 Series delivers! It's a marvel of new and improved genetics—a better canola variety—designed to get you growing!

Don't let Yield Dysfunction keep you from a full and satisfying crop—ask about the 1900 Series today.

Because performance matters.

*Common side effects may include increased yield, suitability to all growing zones and strong disease resistance.

*Caution: Higher yield and resulting higher profits may cause euphoria. In the event of a smile that lasts longer than four days, please contact CANTERRA SEEDS immediately to share the good news.

Always Growing
