

Varietal Characteristics:

- **Growing Zone:** Suited to all pea growing zones.
- **Yield:** Very good potential, especially in the black and dark brown soil zones.
- **Maturity:** 4 days earlier than Carneval (on average).
- **Growth Habit:** Bush-type pea, pods tend to form to top of plant.
- **Vine Length:** 30 inches, shorter than Carneval and Eclipse.
- **Lodging:** 2.5 [1-9 scale]. Very good resistance, better than Carneval and Eclipse.
- **Seed Size:** Medium.
- **Quality:** Seed shape is smooth and % seed breakage is better than Carneval.
- **Disease Resistance:** MS to fusarium wilt; S to mycosphaerella and powdery mildew.
